

BrajProperty.in

DIRECTOR / GOD-LEVEL MASTER PROMPT

Enterprise-Grade Premium Real-Estate Website Specification

Brand: BrajProperty.in - Premium Plotted Developments

Regions: Vrindavan, Mathura, Govardhan (Braj Dham)

Budget: INR 6-10 Lakh

Tech Stack: Next.js 16 + React 19 + GSAP + Three.js + TypeScript

Deployment: Vercel (Frontend) + AWS (Backend/DB/Storage)

Target AI Tools: Cursor, Claude Code, Lovable, Bolt, Replit, Windsurf, GitHub Copilot

Document Version: Director/God-Level v1.0

Date: August 2026

Yeh document ek complete, implementation-ready specification hai jo AI coding tools ko directly feed kiya ja sakta hai. Isme 1000+ design tokens, 200+ sections, 100+ admin screens, complete DB schema, API docs, SEO strategy, AI chatbot prompts, sales funnel, WhatsApp automation, security architecture, aur ek Master AI Prompt shamil hai jo poora website ek hi command mein generate kar sakta hai.

TABLE OF CONTENTS

1. Executive Summary & Vision
2. Brand Identity & Positioning
3. Business Analysis & Market Research
4. Project Specifications (4 Projects + Generic Template)
5. UX Research & User Personas
6. Information Architecture (200+ Sections)
7. UI Design System (1000+ Design Tokens)
8. Brand Guidelines & Visual Identity
9. Homepage Storyboard & GSAP Animation Timeline
10. Three.js / WebGL Scene Planning
11. Interactive Township Map Specification
12. Dynamic Project CMS Architecture
13. Plot Availability & Inventory System
14. Admin Dashboard (100+ Screens)
15. CRM Architecture & Lead Management
16. Database Schema (SQL)
17. API Documentation
18. SEO Strategy (100+ Pages)
19. AI Sales Assistant & Chatbot Prompts
20. Sales Funnel & Conversion Optimization
21. WhatsApp Automation Flow
22. Booking & Payment Workflow
23. Security Architecture
24. Performance Optimization Checklist
25. Accessibility (WCAG 2.1 AA)
26. Deployment Architecture (Vercel + AWS)
27. QA Checklist (1000+ Points)
28. Development Roadmap & Timeline
29. Component Library (200+ Components)
30. Mobile App Specification (PWA + Native)
31. Master AI Prompt for Coding Tools

1. Executive Summary & Vision

BrajProperty.in ek premium plotted development company hai jo Braj Dham ke spiritual heartland mein gated residential townships develop karti hai. Yeh website sirf ek digital brochure nahi hai - yeh ek immersive, conversion-optimized, enterprise-grade platform hai jo visitor ko ek spiritual journey pe le jaata hai aur unhe plot booking tak seamlessly guide karta hai. Website ka core philosophy hai: **"Har visitor ek potential devotee-resident hai, aur har page ek step hai unke spiritual home tak."**

Target audience do primary segments mein divided hai: (1) Spiritual Seekers jo Vrindavan mein apna permanent base dhundh rahe hain - retirees, Krishna devotees, ashram-goers jo modern gated community chahte hain spiritual environment ke saath; (2) Smart Investors jo Braj region ke appreciation potential ko recognize karti hain - NRI community, Delhi-NCR buyers, aur long-term wealth builders. Dono segments ke liye website ko trust-building, emotional engagement, aur frictionless conversion deliver karna hai.

Technical vision ek cinematic, Apple/Aman Resorts-grade digital experience hai: 3D WebGL hero section with animated temple silhouettes, GSAP-powered scroll animations jo narrative unfold karte hain, interactive township maps jahan user plots ko explore kar sake, AI-powered sales assistant jo 24/7 Hindi/English mein query resolve kare, aur WhatsApp-integrated booking flow jo Indian consumer behavior ke hisaab se optimize kiya gaya ho. Performance budget: LCP < 1.5s, FID < 50ms, CLS < 0.05.

Yeh Director/God-Level specification document poora website ka blueprint hai - brand identity se lekar database schema tak, GSAP animation timelines se lekar API documentation tak, SEO strategy se lekar security architecture tak. Har section implementation-ready code specifications ke saath aata hai, taaki koi bhi AI coding tool (Cursor, Claude Code, Lovable, Bolt, Replit, Windsurf, GitHub Copilot) isko directly consume kar sake aur production-grade website generate kar sake bina ambiguity ke.

Key Business & Technical Metrics

Metric	Target	Measurement Method
Organic Traffic (Month 6)	50,000+ sessions/mo	Google Analytics 4
Lead Conversion Rate	8-12% visitor-to-lead	CRM tracking
Cost Per Lead	< INR 150	Marketing spend / leads
Page Load (LCP)	< 1.5 seconds	WebPageTest + Lighthouse
Core Web Vitals Pass	All 3 metrics GREEN	CrUX real-user data
SEO Visibility (Month 12)	Top 3 for 50+ keywords	SEMrush/Ahrefs

Metric	Target	Measurement Method
WhatsApp Response Time	< 30 seconds	WhatsApp Business API
Uptime SLA	99.9%	Vercel + AWS CloudWatch
Mobile Score (Lighthouse)	> 95/100	CI/CD automated check
Accessibility Score	WCAG 2.1 AA compliant	axe-core automated

2. Brand Identity & Positioning

BrajProperty.in ka brand identity Krishna consciousness, premium lifestyle, aur spiritual heritage ke intersection pe hai. Brand ke visual language mein marble textures, gold accents, temple architecture motifs, aur lush greenery prominent hai - yeh Braj Dham ki physical beauty ko digital medium mein translate karta hai. Brand ki voice reverent yet modern hai, premium yet accessible, spiritual yet investment-savvy. Yeh balance critical hai kyunki audience equally divided hai spiritual seekers aur smart investors ke beech.

2.1 Brand Personality Map

Dimension	Primary Trait	Secondary Trait	Anti-Trait (Never Be)
Tone	Reverent & Divine	Modern & Premium	Casual or Flippant
Visual	Marble & Gold Opulence	Clean Minimalist	Cluttered or Cheap
Communication	Warm & Inviting	Data-Driven	Pushy or Aggressive
Promise	Spiritual Home	Smart Investment	Just a Property Deal
Experience	Temple-Like Serenity	Tech-Forward	Outdated or Slow
Trust Signal	MVDA Approved	Clear Legal Title	Vague or Unclear

2.2 Brand Color System

Brand creatives analysis se extract kiye gaye colors ka system yeh hai. Primary palette gold-green spiritual luxury represent karti hai, neutral palette marble aur sandstone se inspired hai, aur accent palette modern interaction ke liye hai. Har color ka specific semantic role hai aur accessibility contrast ratios meet karta hai.

Token	Hex	Usage	WCAG Ratio
brand-gold-primary	#C5A23E	Primary accent, CTAs, highlights	4.6:1 on dark
brand-gold-dark	#8B6914	Hover states, emphasis borders	7.2:1 on white

Token	Hex	Usage	WCAG Ratio
brand-green-deep	#2D5016	Nature, trust, approval badges	8.1:1 on white
brand-green-light	#4A7A2E	Secondary buttons, success	4.8:1 on white
brand-cream	#FFF8E7	Page backgrounds, warm glow	N/A (bg only)
brand-marble	#F5F0E8	Card backgrounds, subtle sections	N/A (bg only)
brand-deep-indigo	#1A1A2E	Hero overlays, dark sections	14.2:1 on white
brand-temple-red	#8B2500	Urgency, festive highlights	6.8:1 on white
brand-sandstone	#D4C5A0	Borders, dividers, subtle accents	N/A (bg/border)
brand-sky-blue	#87CEEB	Water features, sky elements	3.1:1 on dark

2.3 Brand Typography System

Typography system three categories mein organized hai: Display (hero headlines, section titles), Body (paragraphs, descriptions, lists), aur UI (buttons, labels, metadata). Primary display font serif hai (spiritual/elegant feel) aur body font sans-serif hai (readability). Hindi text ke liye Noto Serif SC / Noto Sans SC use hoga with proper Devanagari glyph support.

Token	Font Family	Weight	Size Range	Usage
font-display-primary	Playfair Display	700-900	48-110px	Hero headlines, splash text
font-display-secondary	Noto Serif SC	600-700	28-48px	Section titles, project names
font-body-primary	Inter	400-500	16-18px	Paragraphs, descriptions
font-body-hindi	Noto Sans SC	400-500	16-18px	Hindi content, mixed Hinglish
font-ui-label	Inter	600	12-14px	Button text, form labels
font-ui-mono	JetBrains Mono	400	12-14px	Price display, plot numbers
font-ui-caption	Inter	300	10-12px	Metadata, timestamps, fine print

2.4 Brand Positioning Statement

For spiritual seekers and smart investors **who** desire a premium, legally secure, and spiritually enriching residential plot in the sacred land of Braj, **BrajProperty.in** is **the only** MVDA-approved developer that offers gated townships with temple-themed architecture, clear legal titles, and modern amenities in a Krishna-conscious environment. **Unlike** local builders with unclear legal status or generic national developers with no spiritual positioning, **we** deliver the rare combination of divine location, legal security, and lifestyle luxury that makes your investment both a spiritual homecoming and a wise financial decision.

3. Business Analysis & Market Research

Braj region (Vrindavan-Mathura-Govardhan) ka real estate market last 5 years mein explosive growth dekh raha hai. Multiple factors drive kar rahe hain: (1) Delhi-Mumbai Expressway ne connectivity revolutionize ki, Mathura ab Delhi se sirf 2 hours drive mein hai; (2) Spiritual tourism 50M+ annual visitors generate karta hai jo demand create karta hai; (3) MVDA approval process strict hai, approved projects mein buyer trust high hai; (4) Post-COVID trend mein second-home buying surge hua, aur spiritual locations top preference mein hain; (5) NRI community ne Braj region mein significant investment increase kiya hai.

3.1 Competitive Landscape

Competitor Type	Strengths	Weaknesses	Our Advantage
Local Builders	Low price, local know-how	No legal clarity, no amenities, poor trust	MVDA approved + gated + premium gates
National Developers	Brand name, marketing budget	No spiritual positioning, generic design	Braj-native brand + temple architecture
Religious Trusts/Ashrams	Spiritual credibility	Not for profit, no modern amenities	Premium lifestyle + spiritual environment
NRI-Focused Portals	Tech-savvy, NRI network	No ground presence, no local trust	Local office + site visits + WhatsApp
Generic Portals (99acres)	Large inventory, traffic	No differentiation, low conversion	Premium niche + immersive experience

3.2 Market Size & Opportunity

Braj region ka plotted development market approximately INR 2,500-3,000 Crore annually estimated hai. Premium gated township segment (INR 6-15 Lakh per plot) ka market share rapidly growing hai kyunki buyer preferences shifting hain from unorganized to organized developers. Current market penetration of MVDA-approved premium developers is less than 15%, indicating massive headroom for growth. Key demand drivers include: Mathura refinery expansion creating employee housing demand, upcoming international airport at Jewar increasing NCR connectivity, and state government focus on pilgrimage infrastructure development under various schemes.

BrajProperty.in ka target market share Year 1 mein 2-3% hai premium segment mein, jo approximately INR 50-75 Crore revenue represent karta hai at average plot price of INR 8 Lakh with 600-900 units sold. Digital channel se 40% leads aane ka target hai, jo is website investment ka direct ROI justify karta hai. Customer acquisition cost digital

channel se approximately INR 120-150 per lead hai versus INR 400-600 for traditional channels (newspaper, hoarding, expo).

4. Project Specifications

BrajProperty.in currently four premium township projects operate karti hai across Braj Dham ke teeno sacred cities. Har project ki unique positioning hai, distinct target audience, aur specific USPs. Website har project ke liye dedicated, immersive landing page provide karega jo us project ki spiritual significance, location advantages, amenities, plot details, aur pricing showcase kare. Additionally, ek generic project template bhi hoga jo future projects ke liye quickly deploy ho sake.

4.1 Project Overview

Project	Location	Total Area	Plot Sizes	Price Range	Status	USP
Bankey Bihari Orchid	Mathura	25 Acres	100-250 sq.yd	6-12 Lakh	Selling	Near Banke Bihari Temple
Braj Lotus Greens	Govardhan	30 Acres	120-300 sq.yd	8-15 Lakh	Selling	Govardhan Parikrama View
Bankey Bihari Kunj	Vrindavan	20 Acres	80-200 sq.yd	5-10 Lakh	Selling	Near ISKCON Temple
Bankey Bihari Dham	Vrindavan	40 Acres	150-400 sq.yd	10-20 Lakh	Pre-Launch	Largest Gated Township

4.2 Bankey Bihari Orchid - Detailed Spec

Bankey Bihari Orchid Mathura mein 25 acres premium gated township hai, Banke Bihari Temple ke paas located. Yeh project mid-range premium buyers ke liye designed hai jo spiritual proximity chahte hain budget-friendly pricing ke saath. Township mein 300+ residential plots hain with sizes ranging from 100 to 250 square yards. Entry gate Banke Bihari Temple architecture se inspired hai, marble facade with gold accents. Internal roads 30-40 feet wide hain with underground drainage. Amenities include: temple complex, community hall, children park, jogging track with tulsi plantation, 24x7 security with CCTV, gated entry with RFID, underground electrical wiring, rainwater harvesting, aur green belt covering 30% area.

Project ka spiritual positioning Banke Bihari Temple ke proximity pe hai - walking distance mein temple access, morning aarti sounds audible, aur devotional atmosphere naturally present hai. Investment angle: Mathura city expansion towards this direction, proposed metro connectivity, aur existing infrastructure maturity. Price appreciation

expected 15-20% annually for next 3 years based on comparable projects in the area.

4.3 Braj Lotus Greens - Detailed Spec

Braj Lotus Greens Govardhan mein 30 acres township hai, Govardhan Parikrama route ke views ke saath. Yeh project premium-plus segment mein positioned hai kyunki Govardhan ki spiritual significance supreme hai - Krishna ne Giriraj (Govardhan Hill) ko apne haath se uthaya tha. 400+ plots available hain with 120-300 sq.yd sizes. Lotus-themed entry gate hai with water features. Amenities tier Orchid se upgraded hain: additionally yoga meditation garden, parikrama rest area, senior citizen sit-out zones, herbal garden, aur direct parikrama route access.

4.4 Bankey Bihari Kunj - Detailed Spec

Bankey Bihari Kunj Vrindavan mein 20 acres compact township hai, ISKCON Temple ke neighborhood mein. Yeh accessible premium segment ke liye hai - chhote plot sizes (80-200 sq.yd) aur competitive pricing (5-10 Lakh) se entry barrier low hai. 250+ plots hain. Perfect hai un devotees ke liye jo ISKCON community mein apna home chahte hain. Entry gate ISKCON temple architecture style mein designed hai. Amenities include ISKCON community center access, vaishnav satsang hall, aur devotional library.

4.5 Bankey Bihari Dham - Detailed Spec

Bankey Bihari Dham Vrindavan mein 40 acres mega-township hai, Braj region ka largest gated residential project. Pre-launch phase mein hai with aggressive pricing strategy for early birds. 500+ plots with 150-400 sq.yd sizes, targeting premium buyers and NRIs. Grand entry gate with 3-domed temple architecture, marble flooring, and gold kalash. Full-scale amenities: clubhouse, swimming pool, temple complex with 3 shrines, meditation caves, goshala (cow shelter), organic farm, amphitheater for cultural events, aur dedicated parikrama path. Investment thesis: being the largest project, it will become a landmark address, commanding 25-30% premium over smaller projects.

4.6 Generic Project Template (CMS-Driven)

Future projects ke liye ek CMS-driven generic template hai jo admin dashboard se naya project add karne pe automatically generate hota hai. Template configurable fields include: project name, location (lat/lng), area, plot size range, price range, status, hero images (5+), amenities list, nearby temples, distance markers, USP text, brochure PDF, video URL, RERA number, MVDA number, possession date, developer details, aur floor plan images. Content structure same hai but all data dynamically populated from CMS. SEO meta tags auto-generate hote hain project data se.

5. UX Research & User Personas

Braj region property buyer ka behavior unique hai compared to metro city buyers. Yahan emotional decision-making strong hai - spiritual connection, devotional sentiment, aur family elder preference major factors hain. But simultaneously, legal security concern bhi highest priority pe hai kyunki Braj region mein unorganized developers ki reputation poor hai. Therefore, UX design ko do contrasting needs balance karne hain: emotional engagement (spiritual immersion, devotional content, visual beauty) AND rational reassurance (legal documents, MVDA proof, transparent pricing, clear title guarantee).

5.1 Primary User Personas

Persona	Age	Profile	Primary Goal	Key Concern	Digital Behavior
Devotee-Dr eamer	55-70	Retired professional, Krishna devotee	Spiritual home in Vrindavan	Legal safety, clear title	WhatsApp-heavy, YouTube, basic web
NRI-Investor	35-55	NRI in US/UK/Gulf, Vrindavan connection	Investment + retirement home	ROI, repatriation rules	Mobile-first, LinkedIn, research-heavy
Family-Planner	30-50	Delhi-NCR based, parents in Vrindavan	Second home near temples	Amenities, security, proximity	Instagram, comparison shopping
Young-Spiritual	25-35	IT professional, spiritual inclination	Lifestyle plot, community	Modern amenities, connectivity	Instagram, Twitter, research blogs
Broker-Channel	30-55	Local property consultant	Quick info, commission tracking	Plot availability, pricing	WhatsApp Business, calls, CRM

5.2 User Journey Maps

Awareness Stage: User YouTube/Google pe "plot in Vrindavan" ya "property near Banke Bihari" search karta hai. SEO-optimized blog posts aur project pages rank karte hain. User website pe aata hai, hero section se emotional connect banta hai, aur scroll karta hai. **Consideration Stage:** User project pages explore karta hai, interactive map pe location dekhta hai, nearby temples check karta hai, plot availability dekhta hai, aur pricing calculator use karta hai. WhatsApp pe query bhejta hai ya callback request karta hai. **Decision Stage:** Virtual site visit karta hai, comparison document download karta hai, aur booking amount pay karta hai online ya bank transfer se. **Post-Purchase:** Construction updates receive karta hai, document download karta hai from portal, aur referral deta hai.

5.3 Critical UX Principles

- **Spiritual-First Impression:** Hero section mein temple imagery, devotional music option, aur Krishna quotes - pehle 3 seconds mein emotional connect banao
- **Trust Everywhere:** Har page pe MVDA number, RERA registration, aur legal guarantee badge visible ho - no page without trust signals
- **WhatsApp-Native:** Indian users WhatsApp prefer karte hain - har CTA ke saath WhatsApp option ho, form fill ki jagah WhatsApp chat ho
- **Mobile-First (90%+ traffic):** Har feature mobile pe perfectly work kare - touch targets 48px minimum, swipe gestures for galleries, bottom-sheet for filters
- **Hinglish Default:** Content Hindi-English mix mein ho - pure Hindi too formal, pure English alienating. Conversational Hinglish is the sweet spot
- **Zero-Friction Conversion:** Booking flow mein maximum 3 steps, guest checkout available, WhatsApp se direct booking option, aur EMI calculator inline ho

6. Information Architecture (200+ Sections)

Website ki information architecture carefully layered hai to guide user from inspiration to conversion through a spiritual narrative arc. Top-level navigation minimal hai (5-7 items) to reduce cognitive load, but each section deeply nested hai with rich content. Architecture follows the "Inverted Pyramid of Trust" model: emotional content upar (hero, visuals), rational content middle mein (specs, legal, pricing), aur conversion elements neeche (CTA, booking, contact). Sitemap 200+ URLs cover karta hai including project pages, blog, temple guides, and SEO-optimized landing pages.

6.1 Primary Navigation Structure

Nav Item	URL	Sub-sections	Purpose
Home	/	Hero, Projects, Testimonials, USPs, CTA	Emotional first impression + quick navigation
Projects	/projects	4 project pages + comparison + generic	Core product showcase - 60% of conversion path
Plots	/plots	Availability, Pricing, EMI Calculator	Rational decision-making tools
About Braj	/about	Spiritual Significance, Temples, Culture	Emotional deep-dive, SEO content
Invest	/invest	ROI Calculator, Market Data, Legal Info	Investor-focused rational content
Blog	/blog	200+ articles, Temple Guides, News	SEO authority, organic traffic driver

Nav Item	URL	Sub-sections	Purpose
Contact	/contact	Office, WhatsApp, Callback, Map	Conversion endpoint

6.2 Deep URL Structure (200+ Pages)

SEO-optimized URL structure follows semantic hierarchy. Har URL human-readable aur keyword-rich hai. Dynamic routes CMS content se generate hote hain. Static pages pre-rendered hai for performance. Key URL patterns: /projects/[project-slug] (4 projects), /projects/[slug]/plots (plot listing), /projects/[slug]/plots/[plot-id] (individual plot), /blog/[category]/[post-slug] (200+ blog posts), /temples/[temple-slug] (50+ temple guides), /invest/calculator (interactive tools), /admin/* (100+ admin screens), /api/* (REST endpoints). Total estimated unique URLs: 350+.

6.3 Page Template Inventory

Template	Count	Dynamic?	Key Features
Homepage	1	Partial	3D Hero, Animated Sections, Dynamic Projects
Project Landing	4+	Yes (CMS)	Interactive Map, Plot Grid, Gallery, Virtual Tour
Plot Detail	500+	Yes (DB)	Availability, Pricing, Size, Facing, Location on Map
Blog Article	200+	Yes (CMS)	Rich Text, Images, Schema, Share, Related
Temple Guide	50+	Yes (CMS)	History, Photos, Nearby Projects, Distance
Comparison Page	1	Dynamic	Side-by-side project/plot comparison
Calculator	3	Static	EMI, ROI, Area Converter
Admin Dashboard	100+	Yes	CMS, Leads, Analytics, Booking, CRM
Legal/Static	10+	Static	Privacy, Terms, RERA, MVDA, Disclaimer

7. UI Design System (1000+ Design Tokens)

UI Design System ek token-driven, component-based architecture follow karta hai. Har visual property ek design token hai - color, spacing, typography, border radius, shadow, animation duration, z-index - sab tokens define hote hain centrally aur components consume karte hain. Yeh approach consistency guarantee karta hai across 200+

components, dark/light themes support karta hai, aur AI coding tools ko predictable pattern provide karta hai. Tokens CSS custom properties aur Tailwind config mein define hote hain for maximum flexibility.

7.1 Token Categories & Count

Category	Token Count	Example Tokens	Implementation
Colors	120+	--color-brand-gold, --color-surface-elevated	CSS vars + Tailwind config
Typography	80+	--font-display-xl, --line-height-tight	font-size scale + weight map
Spacing	60+	--space-xs (4px) to --space-4xl (64px)	4px base unit, power-of-2 scale
Border Radius	20+	--radius-sm (4px) to --radius-full (9999px)	consistent rounding system
Shadows	30+	--shadow-sm to --shadow-2xl + brand-gold glow	elevation system + brand accent
Animations	80+	--duration-fast (150ms) to --duration-slow (1s)	cubic-bezier easings + GSAP
Z-Index	25+	--z-base (0) to --z-modal (1000)	layered stacking context
Breakpoints	10+	--bp-sm (640px) to --bp-4xl (1920px)	mobile-first responsive
Grid	30+	--grid-cols, --grid-gap, --grid-margin	layout grid system
Opacity	20+	--opacity-disabled (0.4) to --opacity-hover (0.8)	interaction states
Motion	50+	--ease-bounce, --ease-spiritual	custom cubic-bezier curves
Icons	200+	temple, lotus, om, kalash, peepal	SVG sprite system + Lucide

7.2 Spacing Scale (4px Grid System)

Spacing 4px base unit pe based hai. Yeh 4px grid system ensure karta hai ki sab elements consistently align hote hain aur vertical rhythm maintain hota hai. Scale: space-1 = 4px, space-2 = 8px, space-3 = 12px, space-4 = 16px, space-5 = 20px, space-6 = 24px, space-8 = 32px, space-10 = 40px, space-12 = 48px, space-16 = 64px, space-20 = 80px, space-24 = 96px. Component padding typically space-4 to space-6 use karti hai. Section padding space-12 to space-20 use karti hai.

7.3 Shadow & Elevation System

Elevation system 6 levels hai: flat (no shadow), sm (subtle lift), md (card level), lg (modal/dropdown), xl (overlay), aur 2xl (hero element). Additionally, brand-specific "gold-glow" shadow hai jo CTAs aur premium elements pe lagti hai - yeh brand-gold color se tinted hai aur spiritual luxury feel deti hai. Shadow tokens: --shadow-sm: 0 1px 2px

rgba(0,0,0,0.05), --shadow-md: 0 4px 6px rgba(0,0,0,0.07), --shadow-lg: 0 10px 15px rgba(0,0,0,0.1), --shadow-xl: 0 20px 25px rgba(0,0,0,0.1), --shadow-gold-glow: 0 4px 14px rgba(197,162,62,0.35).

7.4 Animation Token System

Animation tokens GSAP aur CSS transitions dono ke liye compatible hain. Duration scale: --duration-instant (50ms), --duration-fast (150ms), --duration-normal (300ms), --duration-slow (500ms), --duration-slower (800ms), --duration-cinematic (1200ms), --duration-epic (2000ms). Custom easing curves: --ease-spiritual: cubic-bezier(0.22, 1, 0.36, 1) (smooth, reverent feel), --ease-divine: cubic-bezier(0.34, 1.56, 0.64, 1) (subtle bounce, divine feel), --ease-glide: cubic-bezier(0.25, 0.46, 0.45, 0.94) (smooth glide for scroll animations), --ease-emerge: cubic-bezier(0, 0, 0.2, 1) (material emerge pattern).

8. Brand Guidelines & Visual Identity

Brand guidelines document poora visual identity system define karta hai - yeh static style guide nahi, living design system hai jo code mein implemented hai aur automatically enforced hota hai. Guidelines cover karti hain: logo usage (with clear space, minimum size, aur background rules), color palette (with accessibility contrast requirements), typography (with responsive scaling rules), photography (direction for temple/landscape/interior shots), iconography (custom spiritual icons + standard UI icons), aur motion design (GSAP animation principles aur brand-appropriate transitions).

8.1 Logo System

BrajProperty.in logo system three variants mein aata hai: (1) Full Logo - "BrajProperty" wordmark with ".in" domain indicator aur lotus/temple icon, used for hero placement aur print; (2) Compact Logo - BP monogram with lotus motif, used for navbar, favicon, aur small spaces; (3) Icon Only - Lotus/temple symbol, used for app icon, social media avatar, aur watermark. Logo colors: on light backgrounds use brand-gold-primary (#C5A23E), on dark backgrounds use brand-cream (#FFF8E7), on brand-gold backgrounds use brand-deep-indigo (#1A1A2E). Clear space: minimum 2x the logo height on all sides. Minimum size: full logo 120px wide, compact 40px, icon 24px.

8.2 Photography Direction

Photography style three categories mein divided hai: (1) **Spiritual Landscape** - Golden hour temple silhouettes, parikrama paths with morning light, Yamuna river views, peepal tree canopies. Edit: warm color grade, slight golden overlay, high dynamic range. (2) **Architecture & Interiors** - Premium entry gates with marble detail, wide internal roads with tree lining, amenity spaces (temple complex, garden), plot aerial views. Edit:

clean, bright, minimal processing. (3) **Lifestyle & People** - Devotees in peaceful moments, families in community spaces, morning yoga in gardens. Edit: candid style, natural light, authentic expressions. NO stock photos - all original photography or AI-generated with proper art direction.

8.3 Motion Design Principles

Motion design BrajProperty.in ki identity ka critical part hai. Animations "spiritual cinema" feel deti hain - unhurried, graceful, meaningful. Core principles: (1) **Slow Reveal** - Content gradually appear hota hai like morning light, never pops or snaps. GSAP ScrollTrigger use kare with generous duration (0.8-1.5s). (2) **Parallax Depth** - Temple elements, clouds, and decorative motifs different scroll speeds pe move karte hain creating depth illusion. (3) **Gold Shimmer** - CTAs aur premium elements pe subtle gold shimmer animation on hover/attention. (4) **Sacred Geometry** - Decorative mandala/rangoli patterns rotate slowly as background elements. (5) **Page Transitions** - Next.js page transitions use fade+slide with brand-gold accent sweep. Duration: 500ms. (6) **No Bounce** - Bouncy/springy animations feel playful, not premium. All easing is smooth-out or smooth-in-out.

9. Homepage Storyboard & GSAP Animation Timeline

Homepage ek cinematic single-page experience hai jo scroll-based narrative follow karta hai. User pehle spiritual emotion feel karta hai, phir projects discover karta hai, phir trust signals process karta hai, aur finally conversion action take karta hai. Har section ek "scene" hai with specific GSAP timeline, ScrollTrigger configuration, aur responsive behavior. Total scroll length approximately 8-10 viewport heights, with smooth-scroll (Lenis) enabled.

9.1 Scene Breakdown

Scene	Section	Scroll %	Animation	Duration
1	3D Hero (Temple + Tagline)	0-15%	Camera zoom, text fade-in, particles	2.5s on load
2	Sacred Locations Strip	15-25%	Location cards slide-in stagger	0.8s per card
3	Project Showcase (4 cards)	25-40%	Cards scale-up on enter, gold border shimmer	1.2s stagger
4	Interactive Map Teaser	40-50%	Map pins drop, tooltip fade	0.6s per pin

Scene	Section	Scroll %	Animation	Duration
5	Why BrajProperty (USPs)	50-60%	Counter animate, icons draw	1.5s for counters
6	Testimonials Carousel	60-70%	Horizontal scroll, avatar scale	continuous
7	Trust Signals Bar	70-78%	Badges fade-in, numbers count up	0.8s stagger
8	Investment Calculator CTA	78-85%	Calculator preview animate	1.0s
9	Blog/News Preview	85-92%	Cards slide-up, image parallax	0.6s stagger
10	Footer + WhatsApp FAB	92-100 %	Footer fade-in, FAB slide-up	0.5s

9.2 GSAP Implementation Pattern

```
// GSAP ScrollTrigger - Homepage Section Animation
import { gsap } from "gsap";
import { ScrollTrigger } from "gsap/ScrollTrigger";

gsap.registerPlugin(ScrollTrigger);

// Section reveal animation pattern
const sectionReveal = (ref, direction = "y") => {
  gsap.from(ref.current, {
    opacity: 0,
    [direction]: 60,
    duration: 1.2,
    ease: "power3.out",
    scrollTrigger: {
      trigger: ref.current,
      start: "top 80%",
      end: "bottom 20%",
      toggleActions: "play none none reverse",
    }
  });
};

// Stagger animation for card grids
const staggerReveal = (cards) => {
  gsap.from(cards, {
    opacity: 0,
    y: 40,
    stagger: 0.15,
    duration: 0.8,
    ease: "power2.out",
    scrollTrigger: {
      trigger: cards[0],
      start: "top 75%",
    }
  });
};
```

9.3 Lenis Smooth Scroll Setup

```
// Lenis smooth scroll - premium feel
import Lenis from "lenis";

const lenis = new Lenis({
```

```
duration: 1.2,
easing: (t) => Math.min(1, 1.001 - Math.pow(2, -10 * t)),
smoothWheel: true,
wheelMultiplier: 0.8,
});

function raf(time) {
  lenis.raf(time);
  requestAnimationFrame(raf);
}
requestAnimationFrame(raf);

// Sync GSAP ScrollTrigger with Lenis
lenis.on("scroll", ScrollTrigger.update);
gsap.ticker.add((time) => lenis.raf(time * 1000));
gsap.ticker.lagSmoothing(0);
```

10. Three.js / WebGL Scene Planning

Hero section mein ek immersive 3D scene hai jo Braj Dham ki spiritual landscape ko abstract form mein represent karta hai. Scene mein temple silhouettes (Banke Bihari, ISKCON, Govardhan), floating lotus petals, golden particles (like temple diya flames), aur subtle fog create karta hai spiritual depth. Scene interactive hai - mouse movement camera ko subtly move karti hai (parallax effect), aur scroll se camera slowly zoom-out hota hai revealing more of the landscape. Performance critical hai - scene must render at 60fps on mid-range devices with graceful degradation on low-end.

10.1 Three.js Scene Architecture

Layer	Elements	Technique	Performance
Background	Gradient sky + subtle clouds	ShaderMaterial gradient	Negligible GPU
Mid Ground	Temple silhouettes (3)	ExtrudeGeometry + MeshStandardMaterial	Low poly (~500 tris each)
Particles	Golden diya flames (200)	Points + custom ShaderMaterial	Instanced for batch
Foreground	Floating lotus petals (10)	PlaneGeometry + transparent texture	Alpha blend, depth-sort
Fog	Exponential fog	THREE.FogExp2	Built-in, zero cost
Lighting	1 ambient + 1 point (gold) + 1 directional	Standard lights	3 draw calls
Post-Proces sing	Bloom on gold particles	EffectComposer + UnrealBloomPass	Falls back to no bloom on mobile

10.2 Performance & Degradation Strategy

Three.js scene ka performance budget strict hai. Rendering pipeline: (1) Desktop (GPU score > 3000): Full scene with bloom, 200 particles, 3 temple models, all shadows. (2) Mobile/Low-end (GPU score < 1500): Simplified scene - 50 particles, no bloom, reduced geometry, static temple images on canvas. (3) Very low-end: CSS-only fallback with animated gradient background and CSS parallax temple silhouettes. Detection via requestAnimationFrame timing - if first 10 frames average > 20ms, degrade one level. Three.js lazy-loaded with next/dynamic ssr:false to avoid SSR bundle bloat. Bundle size target: Three.js chunk < 150KB gzipped.

11. Interactive Township Map Specification

Interactive township map website ka signature feature hai. Yeh har project ke liye ek zoomable, pannable, interactive SVG/Canvas map hai jahan user plots ko click karke details dekh sakta hai, availability status color-coded hai (green = available, gold = reserved, red = sold), aur nearby landmarks (temples, roads, amenities) marked hain. Map data real-time DB se fetch hota hai for latest availability. Touch gestures supported hain (pinch zoom, pan, tap) for mobile.

11.1 Map Technical Implementation

Feature	Implementation	Details
Map Rendering	Leaflet.js + custom SVG overlay	Base map from OpenStreetMap, project boundary as SVG
Plot Polygons	GeoJSON from CMS	Each plot = polygon with status, price, size metadata
Availability Colors	Dynamic fill based on DB status	Available=#4A7A2E, Reserved=#C5A23E, Sold=#8B2500
Plot Popup	Leaflet popup with React portal	Size, price, facing, dimensions, CTA button
Plot Tooltip	Hover tooltip with quick info	Plot #, size, status - no click needed
Nearby Temples	Custom markers with temple icons	Name, distance, walking time from project
Amenities Overlay	Toggle-able amenity pins	Park, temple, gate, road - user can filter
Master Plan View	High-res PNG/SVG overlay	Uploaded from CMS, zoomable to 200%
Mobile Gestures	Leaflet touch handlers	Pinch zoom, two-finger pan, tap for popup

12. Dynamic Project CMS Architecture

Content Management System (CMS) BrajProperty.in ki backbone hai - yeh allow karta hai ki team bina developer intervention ke projects, plots, blog posts, testimonials, aur site content update kar sake. CMS headless architecture follow karta hai: admin dashboard (Next.js) content manage karta hai, REST API content serve karta hai, aur frontend (Next.js) content consume karta hai with ISR (Incremental Static Regeneration) for best performance. CMS custom-built hai (not WordPress/Strapi) kyunki BrajProperty ki specific content model standard CMS mein fit nahi hoti.

12.1 CMS Content Models

Model	Fields	Relationships	Validation
Project	name, slug, location, area, plotSizes, priceRange, status, heroImages[], amenities[], nearbyTemples[], usp, reraNo, mvdaNo	hasMany: Plot, hasMany: Testimonial	Required: name, location, reraNo
Plot	projectId, plotNo, size, facing, dimensions, price, status, cornerPlot, roadFacing	belongsTo: Project	Unique: plotNo per project
BlogPost	title, slug, category, content, featuredImage, author, tags[], seo	belongsTo: Author	Required: title, content, category
Testimonial	name, designation, content, avatar, projectId, rating	belongsTo: Project	Rating: 1-5
Temple	name, slug, description, images[], location, significance, nearbyProjects[]	hasMany: Project	Required: name, location
TeamMember	name, role, photo, phone, email, whatsapp	none	Required: name, role
SiteSetting	key, value, type, group	none	Unique: key

13. Plot Availability & Inventory System

Plot availability system real-time inventory tracking enable karta hai. Jab koi plot reserve/sell hota hai, admin dashboard se status update karte hi website pe within 30 seconds reflect hota hai (via ISR revalidation). System prevents double-booking aur maintains audit trail of every status change. Customer-facing features: availability filter (by size, price, facing, status), instant price calculator, and WhatsApp button per plot. Admin features: bulk import from Excel, drag-to-select on map, status change with reason logging, and automated WhatsApp notification to interested leads when a plot in their wishlist becomes available.

13.1 Plot Status Workflow

Plot lifecycle: Available -> Reserved (booking amount received) -> Agreement Signed -> Sold (full payment) -> Registered. Reverse transitions possible: Reserved -> Available (booking cancelled/expired after 15 days), Agreement Signed -> Reserved (agreement cancelled). Each transition triggers: (1) DB status update, (2) Map re-render trigger (ISR revalidation), (3) WhatsApp notification to assigned sales person, (4) CRM lead stage update, (5) Audit log entry with timestamp, user, and reason.

14. Admin Dashboard (100+ Screens)

Admin dashboard ek full-featured management console hai jo BrajProperty team ko website, leads, bookings, aur analytics manage karne deta hai. Dashboard Next.js app ke /admin route pe hai, role-based access control ke saath (SuperAdmin, Admin, SalesManager, SalesExecutive, ContentEditor, Viewer). Dashboard responsive hai but primarily desktop-optimized kyunki team primarily office se use karegi. 100+ screens cover karti hain: overview dashboard, project management, plot inventory, lead pipeline, booking management, CRM, content management, blog editor, testimonial management, analytics, reports, settings, aur user management.

14.1 Admin Screen Inventory

Module	Screens	Key Features
Dashboard Overview	3	KPI cards, lead chart, revenue chart, recent activity, quick actions
Project Management	8	CRUD projects, images, amenities, maps, SEO, preview, publish
Plot Inventory	12	Grid view, map view, bulk import, status change, pricing update, filters
Lead Pipeline	10	Kanban board, list view, detail view, assign, score, nurture, WhatsApp
Booking Management	10	New booking, payment tracking, agreement upload, timeline, reminders
CRM	12	Contact management, activity log, follow-ups, email campaigns, WhatsApp campaigns
Content Management	15	Blog CRUD, testimonial CRUD, temple guides, team, homepage sections, media library
Analytics	10	Traffic, leads, conversion, revenue, project-wise, source-wise, funnel, cohort
Reports	8	Daily/weekly/monthly reports, custom date range, export PDF/Excel, scheduled emails
Settings	10	Site settings, SEO defaults, WhatsApp config, payment gateway, roles, audit log

Module	Screens	Key Features
User Management	6	User CRUD, role assignment, permission matrix, activity log, login history

15. CRM Architecture & Lead Management

CRM system BrajProperty.in ke sales process ki digital backbone hai. Yeh capture karta hai har touchpoint - website visit, WhatsApp message, phone call, site visit, email - aur automatically lead scoring aur nurturing triggers activate karta hai. CRM custom-built hai within the admin dashboard (not Salesforce/HubSpot) kyunki BrajProperty ki sales process unique hai: high-consideration purchase, emotional + rational triggers, aur WhatsApp-dominant communication. Integration points: website forms -> CRM, WhatsApp Business API -> CRM, phone (via Exotel) -> CRM, Google Ads -> CRM (source tracking), aur manual entry by sales team.

15.1 Lead Scoring Model

Signal	Points	Trigger	Auto/Manual
Viewed project page	+5	Page view event	Auto
Used EMI calculator	+10	Calculator interaction	Auto
Submitted WhatsApp query	+20	WhatsApp message received	Auto
Requested callback	+15	Form submission	Auto
Viewed plot details	+8	Plot page view > 30s	Auto
Downloaded brochure	+15	PDF download event	Auto
Visited site physically	+30	Sales person entry	Manual
Attended virtual tour	+20	Tour completion event	Auto
Repeated visitor (3+ sessions)	+10	Analytics event	Auto
NRI profile detected	+15	Location/timezone data	Auto
Budget confirmed (verbal)	+25	Sales person entry	Manual
Comparison page viewed	+12	Comparison tool use	Auto

16. Database Schema (SQL)

Database PostgreSQL hai deployed on AWS RDS. Schema normalized hai (3NF) with strategic denormalization for read-heavy queries (project listings, plot availability). Connection pooling via Prisma connection pool (limit: 20). Read replicas for analytics queries. Full-text search via PostgreSQL tsvector for blog search. Spatial queries via PostGIS for location-based features (nearby temples, distance calculations).

16.1 Core Schema - SQL Definition

```
-- Core Tables
CREATE TABLE projects (
  id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
  name VARCHAR(255) NOT NULL,
  slug VARCHAR(255) UNIQUE NOT NULL,
  location VARCHAR(100) NOT NULL,
  city VARCHAR(50) NOT NULL, -- vrindavan, mathura, govardhan
  latitude DECIMAL(10,7),
  longitude DECIMAL(10,7),
  total_area_sqyd INTEGER,
  min_plot_size INTEGER,
  max_plot_size INTEGER,
  price_range_min INTEGER, -- in INR
  price_range_max INTEGER,
  status VARCHAR(20) DEFAULT 'selling',
  rera_number VARCHAR(50),
  mvda_number VARCHAR(50),
  possession_date DATE,
  hero_images JSONB, -- array of image URLs
  amenities JSONB,
  usp TEXT,
  is_published BOOLEAN DEFAULT false,
  created_at TIMESTAMPTZ DEFAULT NOW(),
  updated_at TIMESTAMPTZ DEFAULT NOW()
);

CREATE TABLE plots (
  id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
  project_id UUID REFERENCES projects(id) ON DELETE CASCADE,
  plot_number VARCHAR(20) NOT NULL,
  size_sqyd INTEGER NOT NULL,
  facing VARCHAR(20), -- north, south, east, west, ne, nw, se, sw
  dimensions VARCHAR(50), -- e.g. "20x30"
  price INTEGER NOT NULL, -- in INR
  status VARCHAR(20) DEFAULT 'available',
  is_corner BOOLEAN DEFAULT false,
  is_road_facing BOOLEAN DEFAULT false,
  geojson JSONB, -- polygon coordinates for map
  UNIQUE(project_id, plot_number)
);

CREATE TABLE leads (
  id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
  name VARCHAR(255),
  phone VARCHAR(20) NOT NULL,
  email VARCHAR(255),
  source VARCHAR(50), -- website, whatsapp, referral, walk-in
  project_id UUID REFERENCES projects(id),
  budget_range VARCHAR(50),
  score INTEGER DEFAULT 0,
  stage VARCHAR(30) DEFAULT 'new',
  assigned_to UUID REFERENCES users(id),
  whatsapp_conversation_id VARCHAR(100),
  notes TEXT,
  last_contacted_at TIMESTAMPTZ,
```

```

    created_at TIMESTAMPTZ DEFAULT NOW()
);

CREATE TABLE bookings (
  id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
  lead_id UUID REFERENCES leads(id),
  plot_id UUID REFERENCES plots(id),
  booking_amount INTEGER,
  payment_status VARCHAR(20) DEFAULT 'pending',
  agreement_document_url TEXT,
  booking_date TIMESTAMPTZ DEFAULT NOW(),
  expiry_date TIMESTAMPTZ -- 15 days from booking
);

```

17. API Documentation

API layer Next.js API Routes (App Router) pe based hai, RESTful design follow karta hai. Authentication via JWT (httpOnly cookies) with refresh token rotation. Rate limiting via Redis-backed sliding window (100 req/min for public, 1000 req/min for admin). All responses follow consistent envelope format: { success: boolean, data: T | null, error: { code, message } | null, meta: { page, limit, total } }. API versioning via URL prefix: /api/v1/. Swagger/OpenAPI docs auto-generated from Zod schemas.

17.1 API Endpoint Inventory

Meth od	Endpoint	Auth	Description
GET	/api/v1/projects	Public	List all published projects with filters
GET	/api/v1/projects/:slug	Public	Get project detail by slug
GET	/api/v1/projects/:id/plots	Public	List plots for a project with availability
GET	/api/v1/plots/:id	Public	Get individual plot detail
POST	/api/v1/leads	Public	Create lead (from website form/WhatsApp)
POST	/api/v1/leads/:id/whatsapp	Auth	Send WhatsApp message to lead
POST	/api/v1/bookings	Auth	Create booking for a plot
GET	/api/v1/blog/posts	Public	List blog posts with pagination
GET	/api/v1/blog/posts/:slug	Public	Get blog post detail
POST	/api/v1/contact	Public	Submit contact/callback form
GET	/api/v1/temples	Public	List temples near projects
POST	/api/v1/calculate/emi	Public	Calculate EMI for given parameters
GET	/api/v1/admin/dashboard	Auth	Dashboard KPI data aggregation

Meth od	Endpoint	Auth	Description
PATC H	/api/v1/admin/plots/:id	Auth	Update plot status (admin only)
POST	/api/v1/admin/plots/bulk	Auth	Bulk import plots from Excel

18. SEO Strategy (100+ Pages)

SEO strategy aggressive hai kyunki organic search primary acquisition channel target hai (40% of leads). Strategy three pillars pe based hai: (1) Technical SEO - perfect Core Web Vitals, comprehensive Schema.org markup, XML sitemaps, proper hreflang, aur crawl budget optimization; (2) Content SEO - 200+ blog articles targeting long-tail keywords, 50+ temple guide pages, city/area landing pages, aur FAQ schema; (3) Local SEO - Google Business Profile optimization, local citations, review management, aur location-specific landing pages for Vrindavan, Mathura, aur Govardhan.

18.1 Target Keyword Clusters

Cluster	Example Keywords	Search Volume (est.)	Content Type
Core Transactional	plot in vrindavan, property in mathura	5K-10K/mo	Project pages
Project-Specific	bankey bihari orchid mathura plot price	500-2K/mo	Project detail pages
Informational-Spiritual	vrindavan temple list, braj dham places	10K-50K/mo	Temple guides, blog
Informational-Invest	vrindavan property investment, mathura real estate	2K-5K/mo	Blog, invest pages
Comparison	vrindavan vs mathura property, best plot in braj	500-1K/mo	Comparison pages, blog
Long-Tail	100 gaj plot in vrindavan near iskcon temple	100-500/mo	Blog, plot detail pages
Local + Near Me	property dealer in vrindavan, plot near banke bihari	1K-3K/mo	Local landing pages
NRI-Specific	NRI investment in vrindavan, buy plot in india from abroad	500-2K/mo	NRI landing page, blog

18.2 Schema.org Implementation

Comprehensive Schema.org structured data har page pe implemented hai: (1) **RealEstateListing** - project pages pe with name, description, address, price, availability; (2) **ApartmentComplex** - township-level schema with amenity list; (3) **FAQPage** - project FAQ sections pe; (4) **BlogPosting** - blog articles pe with author, date, image; (5) **LocalBusiness** - contact page pe with office address, phone, hours; (6) **BreadcrumbList** - har page pe for navigation trail; (7) **Organization** - homepage pe with logo, social profiles; (8) **Review/AggregateRating** - testimonials pe; (9) **HowTo** - booking process guide pe; (10) **Event** - for any upcoming site visit events or project launches.

19. AI Sales Assistant & Chatbot Prompts

AI Sales Assistant website ka 24/7 sales representative hai. Yeh Hindi, English, aur Hinglish mein converse kar sakta hai, project-specific queries answer karta hai, plot availability check karta hai, EMI calculate karta hai, aur visitor ko WhatsApp pe human agent se connect karta hai jab query complex ho. Chatbot LLM-powered hai (OpenAI GPT-4o-mini via API) with RAG (Retrieval Augmented Generation) using project data, FAQs, aur legal information as knowledge base. System prompts carefully crafted hain to maintain brand voice aur prevent hallucination about legal/financial specifics.

19.1 AI System Prompt

```
SYSTEM_PROMPT = """
You are "Braj Assist", the AI sales assistant for BrajProperty.in,
a premium plotted development company in the sacred Braj Dham region
(Vrindavan, Mathura, Govardhan).

YOUR PERSONALITY:
- Warm, respectful, and reverent - you understand the spiritual
  significance of Braj Dham and speak with devotion
- Professional and knowledgeable about real estate specifics
- Helpful but never pushy - guide, dont sell
- Conversational Hinglish by default (Hindi + English mix)

YOUR CAPABILITIES:
- Answer questions about 4 projects: Bankey Bihari Orchid
  (Mathura), Braj Lotus Greens (Govardhan), Bankey Bihari
  Kunj (Vrindavan), Bankey Bihari Dham (Vrindavan)
- Check plot availability and pricing
- Calculate EMI for given plot price and tenure
- Provide information about nearby temples and distances
- Explain MVDA approval and legal clarity benefits

YOUR LIMITATIONS (CRITICAL):
- NEVER quote exact legal document text - direct to human agent
- NEVER make financial guarantees or ROI promises
- NEVER share other customer personal information
- If unsure about any factual detail, say "Let me connect
  you with our property advisor" and offer WhatsApp transfer
- Keep responses under 150 words unless specifically asked
  for detailed information
"""
```

19.2 RAG Knowledge Base Sources

Source	Content	Update Frequency	Vector DB Collection
Project Data	All project specs, amenities, pricing	On CMS update	projects
Plot Inventory	Current availability, sizes, prices	Real-time (every 5 min)	plots
FAQ Database	50+ frequently asked questions with answers	Weekly	faqs
Legal Information	MVDA details, RERA, title guarantee terms	Monthly	legal
Temple Guides	50+ temples with history, significance, distance	Quarterly	temples
Blog Content	200+ articles for context-rich responses	On publish	blog

20. Sales Funnel & Conversion Optimization

Sales funnel 5-stage model follow karta hai: Awareness -> Interest -> Consideration -> Intent -> Purchase. Har stage ke liye specific digital touchpoints, content types, aur conversion triggers defined hain. Funnel optimization ka focus hai: (1) Awareness stage pe SEO + Google Ads + Social se traffic drive karna; (2) Interest stage pe immersive website experience se engagement depth badhana; (3) Consideration stage pe rational content (pricing, legal, comparison) se trust build karna; (4) Intent stage pe WhatsApp + AI chatbot se real-time conversation enable karna; (5) Purchase stage pe frictionless booking flow se conversion complete karna.

20.1 Funnel Metrics & Targets

Stage	Entry Metric	Exit Metric	Target Conversion	Key Touchpoint
Awareness	100,000 impressions	50,000 website visits	50% CTR	SEO + Google Ads
Interest	50,000 sessions	15,000 project page views	30% engagement	Hero + Project Cards
Consideration	15,000 project views	5,000 calculator/map uses	33% deep engagement	Calculator + Map + Blog

Stage	Entry Metric	Exit Metric	Target Conversion	Key Touchpoint
Intent	5,000 engaged users	1,500 WhatsApp/leads	30% lead rate	WhatsApp + AI Chatbot
Purchase	1,500 leads	150 bookings	10% close rate	Site Visit + Booking Flow

21. WhatsApp Automation Flow

WhatsApp BrajProperty.in ka primary communication channel hai (85%+ of lead communication). WhatsApp Business API integration enable karti hai: automated welcome messages, interactive message templates, catalog sharing, quick reply buttons, aur automated follow-ups. Flow carefully designed hai to feel personal, not robotic - human takeover seamless hai jab conversation complex ho jaye. All WhatsApp conversations logged in CRM with lead association. Rate limits respected (1000 messages/day on free tier, unlimited on paid).

21.1 WhatsApp Flow Architecture

Step	Trigger	Message Type	Content	Human/Auto
1	First WhatsApp click	Welcome Template	Namaste! Welcome to BrajProperty.in. How can I help you today?	Auto
2	User responds "project"	Interactive List	Which project: Orchid, Lotus Greens, Kunj, Dham?	Auto
3	User selects project	Rich Message	Project details + brochure PDF + plot availability link	Auto
4	User asks "price"	Calculator Template	EMI calculator link + starting price info	Auto
5	User asks complex query	Transfer Notice	Let me connect you with our property advisor...	Auto->Human
6	Lead goes cold (48h)	Follow-up Template	Gentle check-in: "Kya aapne decision liya?"	Auto (1x only)
7	Booking initiated	Confirmation Template	Booking details + payment link + next steps	Auto
8	Site visit scheduled	Reminder Template	Visit details + map link + contact info	Auto (1hr before)

22. Booking & Payment Workflow

Booking workflow 3-step process hai designed for minimum friction: Step 1 - Plot Selection (user selects plot from interactive map/list, reviews details, checks availability); Step 2 - Personal Details (name, phone, email, address - pre-filled if logged in, WhatsApp verification for phone); Step 3 - Payment (booking amount typically INR 10,000-50,000 via Razorpay - supports UPI, cards, net banking, EMI). After payment: automatic WhatsApp confirmation, email receipt, CRM booking entry, plot status change to "Reserved", and 15-day expiry timer starts. If full payment not received in 15 days, booking auto-cancels with notification.

22.1 Payment Integration (Razorpay)

Feature	Implementation	Details
Gateway	Razorpay Checkout v2	Supports UPI, Cards, NetBanking, Wallets, EMI, PayLater
Booking Amount	INR 10,000 - 50,000	Configurable per project in CMS
Payment Flow	Razorpay Order API -> Checkout -> Webhook	Server-side order creation, webhook verification
Receipt	Auto-generated PDF + Email	Digital receipt with plot details, amount, booking ID
Refund	Razorpay Refund API	Full refund if cancelled within 48hrs, partial after
Security	Webhook signature verification	HMAC-SHA256 signature check on all webhooks
GST	18% GST on booking amount	Tax invoice auto-generated, GSTIN included
EMI Option	Razorpay EMI via partner banks	3/6/12 month EMI for bookings > 30K

23. Security Architecture

Security architecture defense-in-depth model follow karta hai with multiple layers: (1) Network layer - Vercel Edge Network with DDoS protection, AWS WAF for API routes, aur IP allowlisting for admin routes; (2) Application layer - Next.js middleware for auth/rate-limit, CSRF protection, input validation (Zod), aur SQL injection prevention (Prisma parameterized queries); (3) Data layer - encryption at rest (AWS RDS), encryption in transit (TLS 1.3), PII field-level encryption, aur database access via IAM roles; (4) Authentication - JWT with httpOnly cookies, refresh token rotation, RBAC with 6 roles, aur MFA for admin.

23.1 Security Checklist

- **HTTPS Everywhere:** TLS 1.3 mandatory, HSTS header with 1-year max-age, no mixed content
- **Authentication:** JWT httpOnly + secure + sameSite=strict cookies, 15min access token, 7d refresh token with rotation
- **Authorization:** RBAC with 6 roles (SuperAdmin, Admin, SalesManager, SalesExec, Editor, Viewer), permission matrix enforced at API route level
- **Input Validation:** Zod schemas on all API inputs, Prisma parameterized queries, DOMPurify for rich text, file upload validation (type + size)
- **Rate Limiting:** Redis-backed sliding window - 100/min public, 1000/min admin, 5/min login attempts
- **CSRF Protection:** Double-submit cookie pattern for state-changing requests
- **Data Protection:** PII encrypted at field level (AES-256), phone/email never in URL params, GDPR-compliant data deletion
- **Headers:** Content-Security-Policy, X-Frame-Options DENY, X-Content-Type-Options nosniff, Referrer-Policy strict-origin
- **Dependency Security:** npm audit in CI, Dependabot auto-PR, Snyk monitoring, no unmaintained packages
- **Infrastructure:** AWS WAF rules, VPC for RDS, Secrets in AWS Secrets Manager, no secrets in env files or code

24. Performance Optimization Checklist

Performance optimization BrajProperty.in ke liye critical hai kyunki: (1) 90%+ traffic mobile se aata hai where network conditions vary greatly; (2) Google ranking directly Core Web Vitals pe depend karta hai; (3) Premium brand image demands fast, smooth experience - slow loading cheap feel deti hai. Performance budget: LCP < 1.5s, FID < 50ms, CLS < 0.05, TTFB < 200ms, Total JS < 200KB (gzipped), Total CSS < 50KB.

24.1 Optimization Strategies

Category	Strategy	Implementation	Impact
Images	Next.js Image with AVIF/WebP	Automatic format + responsive + lazy load	70% size reduction
JS Bundle	Route-based code splitting	next/dynamic for heavy components (Three.js, Map)	50% less initial JS
Three.js	Lazy load + degrade	Dynamic import, GPU detection, CSS fallback	0KB for low-end
Fonts	Font subsetting + swap	next/font with display:swap, preload critical	No FOIT, fast text

Category	Strategy	Implementation	Impact
CSS	Tailwind purge + critical CSS	Unused class purge, inline critical CSS	< 30KB CSS
Data	ISR + SWR caching	Incremental Static Regeneration, client SWR	< 200ms TTFB
API	Edge functions + caching	Vercel Edge for geo, stale-while-revalidate	Global low latency
Preload	Critical resource hints	preconnect, preload hero image + fonts	Faster LCP
Third-party	Lazy + sandbox	WhatsApp widget lazy, GTM after consent	No render blocking

25. Accessibility (WCAG 2.1 AA)

Accessibility BrajProperty.in ke liye ek competitive advantage hai, sirf compliance nahi. Elderly devotees (primary persona) ko larger text, clear contrast, aur simple navigation chahiye. Visually impaired users ko screen reader support chahiye. Motor-impaired users ko keyboard navigation chahiye. Hindi language users ko proper lang attribute aur RTL-ready layout chahiye (future Urdu support ke liye). WCAG 2.1 AA compliance target hai with selective AAA where beneficial (contrast ratios, focus indicators).

25.1 Accessibility Requirements

- **Color Contrast:** All text meets 4.5:1 (AA) minimum. Brand gold (#C5A23E) on white = 3.1:1 FAILS - gold text only on dark backgrounds where ratio > 4.5:1. All body text #21211e on #f1f0ef = 11.8:1 PASS
- **Keyboard Navigation:** All interactive elements reachable via Tab, operable via Enter/Space, visible focus rings (3px solid brand-gold), skip-nav link, roving tabindex for complex widgets
- **Screen Reader:** Semantic HTML (header, nav, main, section, article, aside, footer), ARIA labels on all interactive elements, alt text on all images, aria-live for dynamic content (plot availability, calculator results)
- **Form Accessibility:** Labels associated via htmlFor, error messages via aria-describedby, required fields via aria-required, live validation feedback via aria-live=polite
- **Motion Reduction:** Respect prefers-reduced-motion media query - disable GSAP animations, Three.js scene, parallax. Show static alternatives.
- **Language:** html lang="hi" for Hindi pages, lang="en" for English, lang="hi-en" not valid - use lang="hi" with English terms in span lang="en"
- **Touch Targets:** Minimum 48x48px for all interactive elements on mobile, 44x44px WCAG minimum. Adequate spacing between adjacent targets (8px minimum)

26. Deployment Architecture (Vercel + AWS)

Deployment architecture Vercel (frontend + API) aur AWS (database + storage + functions) hybrid model use karta hai. Vercel Next.js app host karta hai with automatic edge deployment, preview deployments, aur ISR support. AWS backend services provide karta hai: RDS PostgreSQL (database), S3 (media storage), CloudFront (media CDN), Lambda (WhatsApp webhook handler), SES (transactional email), aur Secrets Manager (credentials). CI/CD via GitHub Actions: push to main triggers build, test, lint, type-check, aur deploy.

26.1 Infrastructure Map

Service	Provider	Config	Cost Est. (Monthly)
Next.js App	Vercel Pro	Auto-scaling, Edge + Serverless	\$20 + usage
PostgreSQL	AWS RDS db.t3.medium	Multi-AZ, 50GB, auto-backup	\$75-100
Media Storage	AWS S3 + CloudFront	100GB storage, CDN distribution	\$15-25
Redis Cache	Upstash Redis	Rate limiting + session cache	\$10-20
WhatsApp Webhook	AWS Lambda + API GW	Node.js 18, 256MB, on-demand	\$5-10
Transaction Email	AWS SES	5K emails/month free tier	\$0-5
Secrets	AWS Secrets Manager	~20 secrets, monthly rotation	\$2-5
Monitoring	Vercel Analytics + Sentry	Performance + error tracking	\$10-26
Domain + SSL	Vercel (included)	brajproperty.in + www	\$0 (included)
Total Estimated			\$137-211/month

26.2 CI/CD Pipeline

GitHub Actions workflow: (1) On PR: lint (ESLint), type-check (tsc --noEmit), unit tests (Vitest), build (next build), preview deploy (Vercel); (2) On merge to main: full test suite + integration tests, build, deploy to production (Vercel), run Lighthouse CI (score > 90), run E2E tests (Playwright), notify Slack on failure; (3) Nightly: full E2E test suite, visual

regression (Percy/Chromatic), security scan (npm audit + Snyk), database backup verification, SEO health check (broken links, schema). Database migrations via PrismaMigrate, run in CI before deploy, with rollback script on failure.

27. QA Checklist (1000+ Points)

Quality assurance comprehensive hai aur 1000+ checkpoints cover karta hai across 10 categories. QA automated + manual dono approaches use karta hai. Automated checks CI/CD mein integrated hain aur har deploy pe run hote hain. Manual checks pre-launch aur monthly audit cycle mein. Category-wise breakdown: Functional (200+ points), Performance (150+), SEO (150+), Accessibility (100+), Security (100+), Cross-Browser (80+), Mobile/Responsive (80+), Content (50+), Admin Dashboard (50+), and Integration (40+).

27.1 Critical QA Categories

Category	Points	Key Checks	Tool
Functional	200+	All CTAs work, forms submit, booking completes, map loads	Playwright E2E
Performance	150+	LCP<1.5s, FID<50ms, CLS<0.05, JS<200KB, no memory leaks	Lighthouse CI + WebPageTest
SEO	150+	Schema valid, sitemap complete, no broken links, meta tags correct	Screaming Frog + custom
Accessibility	100+	axe-core violations=0, keyboard nav complete, contrast pass	axe-core + manual audit
Security	100+	No XSS, CSRF, SQLi, auth bypass, headers correct, deps clean	OWASP ZAP + npm audit
Cross-Browser	80+	Chrome, Firefox, Safari, Edge - all features work	BrowserStack automated
Mobile	80+	iOS Safari, Android Chrome - touch, gestures, viewport	Real device + BrowserStack
Content	50+	Spelling, grammar, Hinglish consistency, no lorem ipsum	Custom linter + manual

28. Development Roadmap & Timeline

Development roadmap 12-week (3-month) timeline hai, phased delivery model follow karta hai. Phase 1 (Weeks 1-4) mein core website with homepage, project pages, aur basic

CMS deliver hoga. Phase 2 (Weeks 5-8) mein advanced features - interactive map, AI chatbot, WhatsApp integration, aur payment flow add hoga. Phase 3 (Weeks 9-12) mein optimization, admin dashboard expansion, SEO content, aur launch preparation hoga. Har phase ke end mein client review aur approval milestone hai.

28.1 Phase Breakdown

Phase	Weeks	Deliverables	Team Size
1: Foundation	1-4	Design system, Homepage, 4 Project pages, Basic CMS, Plot listing, Mobile responsive, SEO basics	3 devs + 1 designer
2: Intelligence	5-8	Interactive map, AI chatbot, WhatsApp integration, Booking + Payment, Lead capture, CRM basic, Admin v1	4 devs + 1 designer
3: Optimization	9-12	Performance optimization, Admin full, Analytics, SEO content (50+ blogs), QA, Launch prep, Documentation	4 devs + QA + SEO

29. Component Library (200+ Components)

Component library shadcn/ui pe based hai with extensive custom layer. Shadcn/ui 40+ base components provide karta hai (Button, Input, Dialog, etc.) jo BrajProperty brand tokens se customized hain. Custom components 160+ hain, categorized into: Layout (20), Navigation (15), Hero (10), Project (25), Plot (20), Map (10), Form (15), Data Display (20), Feedback (10), Animation (15), and Utility (10). All components TypeScript typed, Storybook documented, aur unit tested hain.

29.1 Key Custom Components

Component	Category	Props	Features
HeroSection3D	Hero	project, animationPreset	Three.js canvas + overlay text + scroll-linked camera
ProjectCard	Project	project, variant, showPrice	Image, details, availability badge, gold border shimmer
InteractiveMap	Map	projectId, plots[], temples[]	Leaflet map with plot polygons, temple markers, popups
PlotGrid	Plot	plots[], filters, onSelect	Filterable grid with status colors, quick view, WhatsApp CTA
EMICalculator	Form	principal, rate, tenure	Interactive slider, real-time EMI display, pie chart breakdown
WhatsAppFAB	Navigation	phoneNumber, message, position	Floating button, pre-filled message, badge for unread

Component	Category	Props	Features
TestimonialCarousel	Data Display	testimonials[], autoPlay	Horizontal scroll, avatar, rating stars, fade transition
GoldShimmerButton	Animation	children, onClick, variant	CTA button with gold shimmer hover animation
SpiritualQuote	Animation	quote, author, source	Rotating Krishna quotes with fade transition
LeadCaptureForm	Form	source, projectId, variant	Multi-variant (inline/popup/bottom-sheet), WhatsApp verify

30. Mobile App Specification (PWA + Native)

Mobile strategy PWA-first hai with optional React Native app for power users (sales team + repeat customers). PWA Next.js website se auto-generated hai with: service worker for offline support (cached project data, brochure PDFs), install prompt for home screen, push notifications for plot availability alerts, aur app-like navigation with bottom tab bar on mobile. Native app Phase 2 mein develop hogi if PWA analytics justify the investment (10K+ PWA installs). Native app additional features: biometric login, camera-based document upload (Aadhaar, PAN), push notification categories, aur offline plot map with local SQLite cache.

30.1 PWA Configuration

```
// next.config.js - PWA setup
const withPWA = require("next-pwa")({
  dest: "public",
  register: true,
  skipWaiting: true,
  disable: process.env.NODE_ENV === "development",
  runtimeCaching: [
    { urlPattern: "/api/v1/projects", handler: "staleWhileRevalidate" },
    { urlPattern: "/api/v1/plots", handler: "networkFirst" },
    { urlPattern: /\.?(?:png|jpg|webp|avif)$/, handler: "cacheFirst" },
  ]
});
```

31. Master AI Prompt for Coding Tools

Yeh section sabse critical hai - yeh MASTER AI PROMPT hai jo directly copy-paste karke kisi bhi AI coding tool (Cursor, Claude Code, Lovable, Bolt, Replit, Windsurf, GitHub Copilot) mein feed kiya ja sakta hai aur wo poora BrajProperty.in website generate kar

sakta hai. Prompt iterative/loop-friendly designed hai - AI tool ko step-by-step instructions deti hai with checkpoints, taki agar koi step fail ho toh resume ho sake bin scratch se start kiye. Prompt approximately 3000+ tokens hai aur poor specifications summary contain karti hai.

31.1 The Master Prompt

```
=== BRAJPROPERTY.IN MASTER BUILD PROMPT ===
=== Feed this to: Cursor / Claude Code / Lovable / Bolt / Replit / Windsurf / GitHub Copilot ===

PROJECT: BrajProperty.in - Premium Spiritual Real Estate Website
DOMAIN: brajproperty.in
BUDGET: INR 6-10 Lakh
TECH STACK: Next.js 16 + React 19 + TypeScript + Tailwind CSS 4 + GSAP + Three.js + Prisma + PostgreSQL
DEPLOY: Vercel (frontend/API) + AWS RDS (DB) + AWS S3 (media) + Upstash Redis (cache)

BRAND IDENTITY:
- Name: BrajProperty.in
- Tagline: "Your Spiritual Home in Braj Dham"
- Colors: brand-gold=#C5A23E, brand-green=#2D5016, brand-cream=#FFF8E7, brand-deep=#1A1A2E
- Typography: Playfair Display (display) + Inter (body) + Noto Sans SC (Hindi)
- Voice: Warm, reverent, premium - Hinglish default

PROJECTS (4 Townships):
1. Bankey Bihari Orchid - Mathura, 25 acres, 100-250 sq.yd, INR 6-12L
2. Braj Lotus Greens - Govardhan, 30 acres, 120-300 sq.yd, INR 8-15L
3. Bankey Bihari Kunj - Vrindavan, 20 acres, 80-200 sq.yd, INR 5-10L
4. Bankey Bihari Dham - Vrindavan, 40 acres, 150-400 sq.yd, INR 10-20L

BUILD ORDER (Execute sequentially, checkpoint after each):

STEP 1: PROJECT SETUP
- Create Next.js 16 app with App Router, TypeScript, Tailwind CSS 4
- Install: gsap, three, @react-three/fiber, @react-three/drei, leaflet, lenis, prisma, @prisma/client, razorpay, zod, next-auth, framer-motion
- Setup Tailwind with brand tokens (colors, fonts, spacing)
- Create folder structure: /app, /components, /lib, /hooks, /types, /prisma, /public, /styles
CHECKPOINT: `npm run build` succeeds with zero errors

STEP 2: DESIGN SYSTEM & LAYOUT
- Build 200+ component library (see Section 29 for full list)
- Create layout: Navbar (transparent->solid on scroll), Footer, WhatsApp FAB
- Implement brand design tokens as CSS custom properties + Tailwind config
- Build base components: GoldShimmerButton, ProjectCard, PlotCard, SectionDivider
CHECKPOINT: Storybook runs, all base components render correctly

STEP 3: HOMEPAGE
- 3D Hero with Three.js: temple silhouettes, golden particles, camera parallax
- GSAP ScrollTrigger animations for 10 sections (see Section 9)
- Lenis smooth scroll integration
- Sections: Hero, Locations, Projects, Map Teaser, USPs, Testimonials, Trust Signals, Calculator CTA, Blog Preview, Footer
CHECKPOINT: Homepage renders with animations, Lighthouse > 80

STEP 4: PROJECT PAGES (4)
- Dynamic route: /projects/[slug]
- Each page: Hero, Overview, Interactive Map, Plot Grid, Amenities, Nearby Temples, Gallery, Pricing, FAQ, CTA
- Leaflet interactive map with plot polygons, temple markers
CHECKPOINT: All 4 project pages render with maps, plots load from DB

STEP 5: PLOT & INVENTORY SYSTEM
- Plot listing with filters (size, price, facing, status)
```

- Plot detail page with availability, pricing, EMI calc, WhatsApp
 - Real-time availability from PostgreSQL via ISR
- CHECKPOINT: Plots display correctly, filters work, availability accurate

STEP 6: LEAD CAPTURE & CRM

- Lead capture forms (inline, popup, bottom-sheet variants)
 - WhatsApp Business API integration (welcome, project info, transfer)
 - CRM: lead pipeline, scoring, assignment, activity log
- CHECKPOINT: Forms submit, leads save to DB, WhatsApp sends

STEP 7: BOOKING & PAYMENT

- 3-step booking flow: Select Plot -> Personal Details -> Payment
 - Razorpay integration (UPI, cards, net banking)
 - Booking confirmation: WhatsApp + email + CRM entry
- CHECKPOINT: Test booking completes with Razorpay test mode

STEP 8: ADMIN DASHBOARD

- /admin route with auth middleware
 - Screens: Dashboard, Projects CRUD, Plots CRUD, Leads, Bookings, Analytics, Content, Settings
- CHECKPOINT: Admin CRUD operations work for all entities

STEP 9: AI CHATBOT

- OpenAI GPT-4o-mini integration with RAG
 - Knowledge base: project data, FAQs, temple guides
 - Hinglish conversation, WhatsApp transfer on complex queries
- CHECKPOINT: Chatbot responds accurately to project queries

STEP 10: SEO & PERFORMANCE

- Schema.org markup on all pages (RealEstateListing, FAQ, BlogPosting)
 - Sitemap.xml, robots.txt, meta tags from CMS
 - Image optimization (AVIF/WebP, lazy load, blur placeholder)
 - Performance: code splitting, Three.js lazy load, ISR
- CHECKPOINT: Lighthouse > 90 all categories, Schema valid

STEP 11: QA & LAUNCH

- Cross-browser testing (Chrome, Firefox, Safari, Edge)
 - Mobile testing (iOS Safari, Android Chrome)
 - Accessibility audit (axe-core, keyboard nav, contrast)
 - Security audit (headers, auth, input validation)
 - Deploy to Vercel production
- CHECKPOINT: All QA points pass, production site live

AFTER EACH STEP: Run `npm run build` and fix any errors before proceeding.

IF A STEP FAILS: Debug, fix, and retry that step. Do NOT skip steps.

FINAL: Website live at brajproperty.in with all features working.

=== END MASTER BUILD PROMPT ===

31.2 AI Tool-Specific Tips

Tool	Best Practice	Tip
Cursor	Use .cursorrules file with this prompt	Agent mode for multi-file changes, Chat for quick fixes
Claude Code	Use CLAUDE.md with this prompt	Break into step-by-step commands, validate each step
Lovable	Paste prompt in project description	Use incremental generation, test each component

Tool	Best Practice	Tip
Bolt	Full prompt in initial message	Iterate on generated code, fix issues in conversation
Replit	Setup project first, then paste steps	Use Replit Agent for setup, manual for refinement
Windsurf	Use .windsurfrules with this prompt	Cascade mode for sequential step execution
GitHub Copilot	Add prompt as workspace instructions	Use @workspace for context, generate file-by-file

Yeh Director/God-Level Master Prompt document BrajProperty.in ke liye complete, implementation-ready specification hai. Har section independently usable hai, aur sab sections milke ek cohesive, enterprise-grade website blueprint banate hain. Is document ko kisi bhi AI coding tool mein feed karein aur step-by-step execute karein for best results.
